# Academy

We are all aware that graduating from dental or medical school with knowledge followed by years of experience is no longer valid for success without continuing education.

As the speed of information increases and artificial intelligence progresses all dentists will find it necessary to adapt to this new era by staying relevant with continuing postgraduate education or they will be left behind due to outdated knowledge and skills. The education gap post graduation has already left some dentist struggling to stay competitive in the new world of dentistry.

The need for lifelong learning and education is exactly why Vesta was developed providing

doctors with a reliable and safe channel for life long education. VESTA was created by Vestiyer publishing group, offering a variety of training on dental and para-dental fields for dentist and their team members.

VESTA is the undisputed leader in Turkey and expresses their mission with this sentence: *Better dentistry and medicine through lifelong postgraduate education.*

We thank you for your kind interest and trust.

# About

Vestiyer Publishing Group has been in the service of dentistry for over a quarter century. In 2005, we decided to create a unit which operates post graduate dental education focused activities within the Vestiyer Publishing Group.

For this new unit, we decided to use the name “VESTA” which is combination of “VEST” from Vestiyer and “A” from Academy.

VESTA held the first training in 2006. VESTA backed by Vestiyer Publishing Group’s experience begin to grow rapidly in a very short time introducing international trainings which drew great interest of dentist worldwide.

VESTA has conducted hundreds of training seminars and conferences for dentists and their assistants. Thousands of participants from Turkey and all over the world preferred VESTA to improve, update and strengthen their education.

VESTA holds trainings throughout Turkey in major cities such as Istanbul, Ankara, Izmir, and Mersin. VESTA has become an international pioneer organizing exclusive trainings for dentists in cities throughout the world including London, Vienna, Los Angeles, Zürich, Las Vegas and Lefkosa to name just a few.

# Course Info

## Course Name

**Dental Implantology Hands-on Course for Advanced and Complex Cases**  
*On Fresh Human Cadavers*  
(not embalmed)

## Faculty

Dr. Norbert Fock, *Maxillofacial Surgeon*  
Dr. Becen Demir, *Periodontist*

## Educational Director

Dr. Mustafa Bekerecioğlu  
mustafa.bekerecioglu@vyg.com.tr

## Operational Director

İlhan Köse  
ilhan.kose@vyg.com.tr

Yunus Goktas  
yunus@knightsbridgeacademy.com

## Duration

2 Days, 7 Hours a Day (Total: 14 Hours)

## Teaching Method

- Theoretical Lessons
- Live demonstrations on fresh human cadavers
- Hands-on practice on fresh human cadavers (not embalmed)

## Language

Course will be delivered in English  
Turkish translation is available

# Anatomy Training Center

Since 1997 “Vienna Human Cadaver Dissection Courses” has been an outstanding platform for highly professional postgraduate training for both dental implantology as well as for aesthetic surgery.

In more than 160 workshops doctors from 60 nations on all continents have contributed to the high reputation of the courses within the academic world.

During our hands-on-workshops you will perform standard and advanced procedures in dental surgery, focusing on the most

recent implant technologies and soft tissue management.

The completely new, technically highly advanced ANATOMY TRAINING CENTER of the Medical University of Vienna has been inaugurated in 2008.

That venue guarantees the best standard for a privileged post graduate training and is a real state of the art location for fresh cadaver dissection courses in Europe.

# Dental Implantology Hands-on Course for Advanced and Complex Cases

MEDICAL UNIVERSITY of VIENNA

## Practical & Theoretical

After a very short theoretical introduction of the surgical procedure by the lecturer you can monitor the live surgery on the flat screen close to you. You accompany each detail in “real time”, simulating a close 1:1 reality on your “patient”.

After the teaching and the instruction you will perform the surgical training on the fresh skull, guided by us, step by step. Two doctors are assigned to one fresh (not embalmed) skull, a well trained team is always around you to help and assist.

There will always be a focus on pitfalls and danger zones for each surgical procedure. There is absolutely no need to be intimidated or concerned with your anatomy and surgery knowledge as you are guided through the entire process.

80-90% of the course time is hands-on training after in in-depth explanation.

### Course Description

The participants will perform Oral Implant Surgery Techniques as described in Topics. 80% of the course are hands-on with 20%

lectures about the techniques and live or video taped dissection/operation (displayed on screen), all step by step.

A maximum of two participants will be assigned to a fresh and not embalmed human cadaver skull - a “close to reality” simulation of the surgical procedures.

### Topics

- Implant placement
- Bone harvesting techniques:  
chin+ramus+palate
- GBR augmentation techniques
- Maxillary sinus elevation techniques
- Epithelial-connective tissue graft harvesting techniques from the palate
- Dissection of anatomical danger zones:
  - *Lingual+inf. alveolar+mental+infraorbicular nerve*
  - *Palatine+facial+submental artery*

# Reasons to Attend

## The advanced participants have the opportunity:

- To try procedures he/she want to do on a patient in the future.
- To detect how close one usually is to delicate anatomical structures.
- This is a full face and neck surgical procedure course where you perform all the procedures.
- See, touch and explore the different anatomical planes, fascia, muscles, nerves, arteries, veins, organs, etc.
- providing you with an incomparable surgical learning experience.
- See structural anomalies.
- We only utilize professional facilities.

## For doctors in training the course has several advantages:

- The only anatomical and surgical step by step hands on dissection course to facial surgeons.
- Extensive knowledge is not a prerequisite.
- We teach you in a friendly & easy-to-learn environment.
- We know your needs and how to meet them and we focus on pitfalls in facial surgery.

# FAQs

## Are the skulls embalmed and can I get diseases from the cadavers?

The skulls are not embalmed and have been frozen before use in the dissection room. The skulls are washed and prepared before the course and are handled in the most aesthetic way to make sure that the dignity of the donor is respected. No information will be provided to you about the donor's history. All donors have no record of infectious diseases; nevertheless you are instructed to handle with care.

## How many doctors are assigned to a cadaver?

There are just two doctors assigned to each cadaver, which makes the hands-on course unique.

## How much hands-on dissection will I perform?

90% of the seminar is hands-on dissection 10% is a lecture with instructional information and recorded "master-dissection"

## How can I arrange to dissect on the same cadaver with a friend?

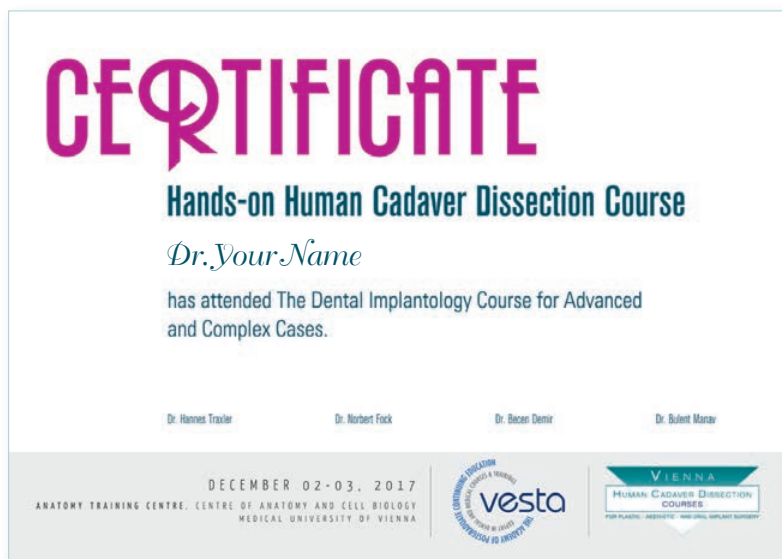

Table assignments are free of choice to you

## Can I take photographs of the cadaver or of the surgical procedure?

Respect for the bequeathed does not allow for still or video photographs in the dissection room.

## Is the hands-on seminar held in a special type of lab?

The Center of Anatomy and Cell Biology at the Medical University of Vienna has a long history of dissecting courses for students

A certificate will be provided by Vesta Akademi & Vienna Human Cadaver Dissection Course.

and doctors. The room where you will work on your cadaver is very large and designed for 120 students. Nevertheless we will not run hands-on courses for groups larger than 40 participants. By utilizing the anatomy lab we are guaranteed a facility with a special ventilation system, proper lighting, special stainless steel tables and large wash areas.

## What happens with the cadaver after the seminar?

The remains are cremated and the University holds a common burial in honour of the bequeathed who have donated their bodies to science.

## What kind of clothing should I wear?

Casual, comfortable clothes are suggested. Remember that you are a guest of the Vienna Medical University so please dress appropriately. You will not be permitted in the Lab with shorts, sandals etc. Preferably some type of sport shoe, since the floors are slippery when wet.

## Should I be concerned about my anatomy knowledge?

There is absolutely no need to be intimidated or concerned with your

anatomy knowledge because we will guide you through the entire dissection process. We know your needs and how to meet them.

## Is there a written test during or upon completing the seminar?

No test is given during or at the end of the seminar.

## Is there additional staff to help me?

The support staff for the seminars is a team of highly skilled and experienced professionals that have been involved with these kinds of seminars for years.

## How long have you been conducting this kind of seminar?

We have been conducting postgraduate seminars specifically designed for dental surgeons and facial surgeons since 1997.
